Professional Experience

Research Analyst Feb 2026 – Present
Arizona State University, Tempe, AZ

- Built a **7-KPI performance framework** translating requirements from **4 stakeholder groups** into measurable targets and reporting standards.
- Analyze operational performance and data quality using **SQL, Python, and Excel** to identify risks and anomalies.
- Manage recurring **dashboards, reports, and stakeholder updates** across multiple workstreams using Google Workspace and analytics tools.
- Translate complex analytical findings into clear **recommendations and performance reporting** for technical and business stakeholders.

Prompt & Generative AI Trainer Apr 2026 – Jul 2026
Handshake, United States

- Evaluated **AI-assisted analyses** across finance, pricing, inventory, ecommerce, and operations, validating source data, calculations, and **KPIs**.
- Developed **prompts, validation criteria, and failure cases** to improve accuracy and reliability of AI-generated work.
- Applied **business-reasoning** skills to evaluate model outputs and identify errors or unsupported conclusions.

Analyst | Associate Analyst Jul 2021 – Dec 2024
Deloitte, Bangalore, India — promoted to Analyst in May 2024

- Managed multiple workstreams across **multimillion-dollar digital transformation** engagements, coordinating scope, timelines, milestones, dependencies, risks, and budgets.
- Used **Asana, Jira, Adobe Workfront, and Confluence** to manage project plans, dependencies, documentation, and delivery status.
- Gathered requirements, wrote **user stories and acceptance criteria**, performed **gap analysis**, and maintained requirements traceability through deployment.
- Partnered with Product, Engineering, QA, and client stakeholders across testing, **UAT, releases**, and post-launch support.
- Tested and validated **REST APIs, system integrations**, data flows, and reporting outputs, coordinating issue resolution across teams.
- Managed **project financials** including budgets versus actuals, forecasts, burn rates, vendor costs, invoices, and month-end reporting.
- Built **Power BI and Tableau** dashboards and automated reporting workflows, improving **reporting efficiency by 40%**.
- Validated **CIBC consent and preference** states, data flows, and **Adobe Analytics** tracking, coordinating fixes with compliance teams.

Programmer Analyst Trainee Nov 2020 – Jul 2021
Cognizant, Pune, India

- Supported **Disney's smart band ecosystem** across application integrations, data, performance analysis, testing, and technology delivery.
- Performed non-functional and **performance testing** using **Java and LoadRunner**, analyzing application behavior, bottlenecks, and system performance.

Certifications

Project Management Professional (PMP) – Project Management Institute (PMI)
